## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed have been fully considered but they are not persuasive.
2. Applicant argues that it is not feasible to put the two references together because Dodds fig. 4 teaches analog signals and Workman fig. 5 between elements 72 and 75 teaches digital signals. This not persuasive. Dodds teaches in col. 7 lines 10-28 that fig. 4 has "pulses indicating binary "0"... binary "1"" (especially lines 15-17). This means pulses indicating digital signals. Workman fig. 5 between elements 72 and 75 also teaches digital signals. Even if this is not sufficient, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).
3. In response to applicant's argument that combining Workman and Dodds would not be functional, again the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).
4. Applicant argues that it would not be obvious to insert the equalizing amplifier of Dodds into a digital circuit and it would not be obvious to insert the equalizing amplifier of Dodds between channel memory 72 of Workman and Mux 109 of Workman. This is not persuasive.

Art Unit: 2631

Workman wants to transmit signals (broad) in general and Dodds teaches a method of transmitting signals over long distances by overcoming data degradation which occurs by transmitting over long distances. Also, again the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art.

### ***Response to Amendment***

#### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 11, 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Workman 4,181,822 in view of Dodds 5,841,841. See prior action for details.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2631

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
